

Parker LINK System Upgrade

From Fibre-Optic to Ethernet: The Future of Parker LINK Systems

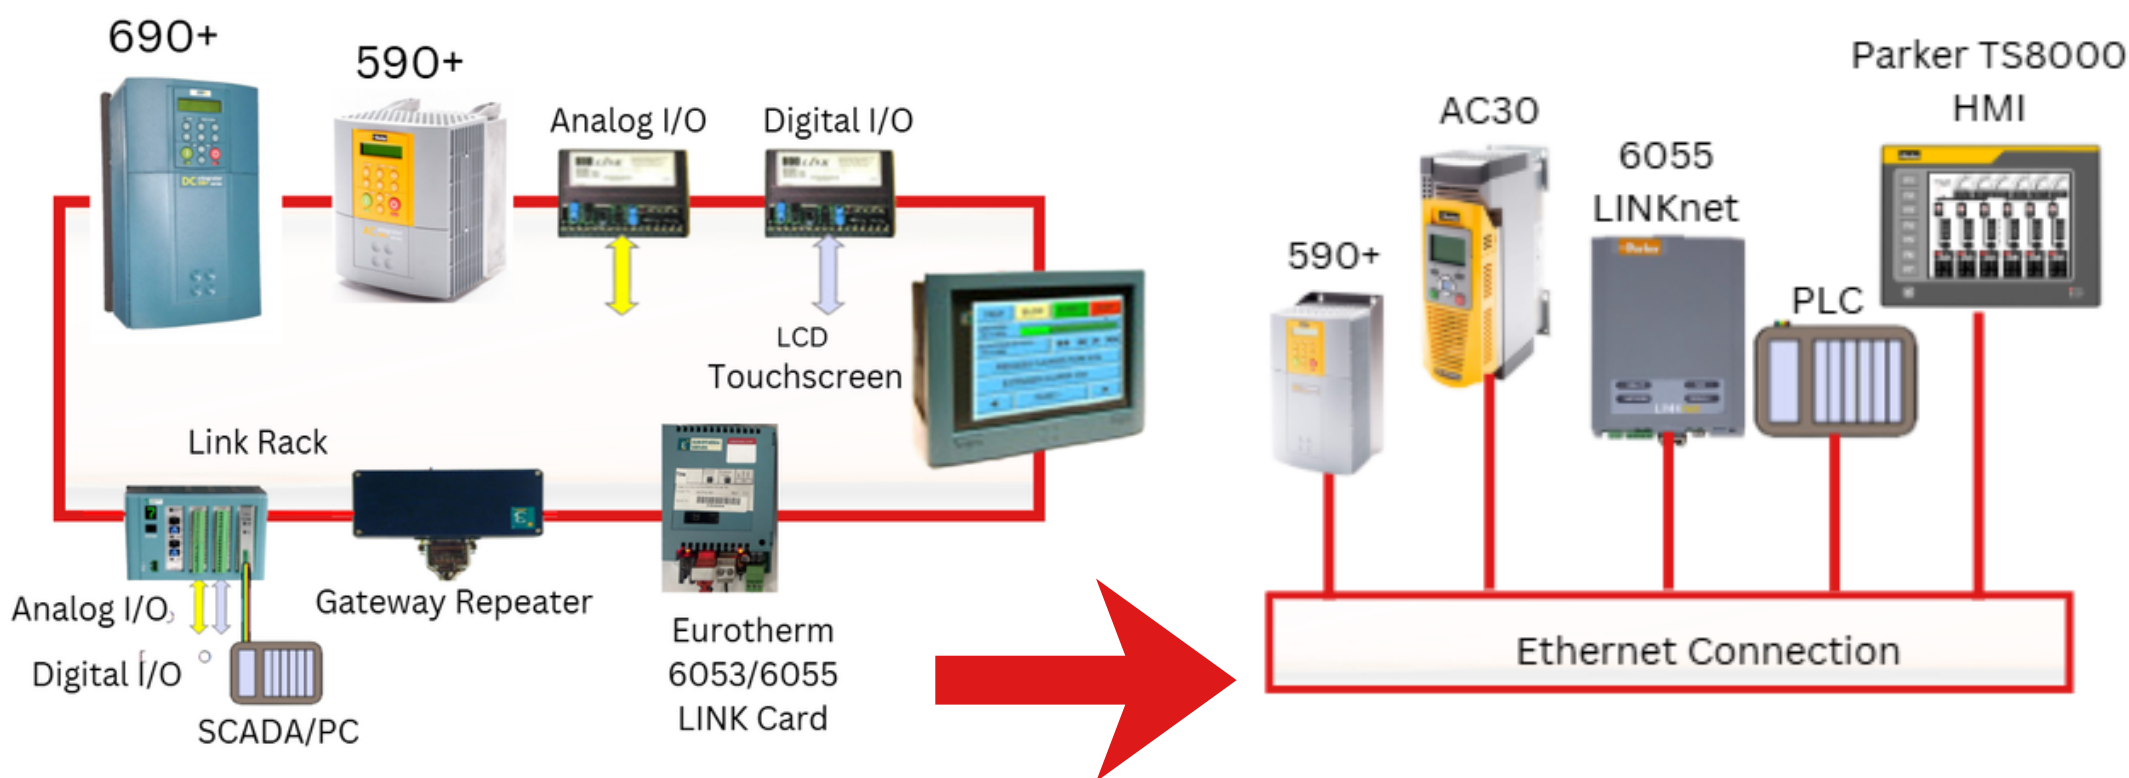

W: www.sdsdrives.com E: info@sdsdrives.com T: +44 (0)117 938 1800

A leading global packaging manufacturer needed to modernise their ageing control system to match today's production demands. SDS Drives replaced their obsolete Eurotherm / SSD Parker LINK fibre-optic network with a modern Parker Ethernet-based LINKnet system — delivering faster diagnostics, higher reliability, and long-term support.

SSD_LINK DSD Software

SSD_LINK DSE890 Software

ASPECT	BEFORE	AFTER
Network Type	Fibre-optic LINK	Ethernet-based LINKnet
Communication Speed	Limited	High-speed, real-time
Software	SSD_LINK DSD	SSD_LINK DSE890
Diagnostics	Basic LED codes	Advanced Parker diagnostics
Parts Availability	Obsolete	Supported & scalable
Downtime	Long reconfiguration	Extended by 10+ years

"We have built a great relationship with SDS over the last 25 years, working hand in hand with them... SDS have always provided expert advice and superior engineering solutions, supporting our complex drives and systems. Their prompt and professional service has been vital to our operation and very helpful to our engineering team."
